

**Subject:** Mission Accomplished!

June 26, 2009

Group,

I am delighted to report that the first Version 6 Ariel Home was successfully completed yesterday evening. More details will follow, but here is a quick look at the finished product. This is the largest, highest quality home we have ever built. The TPO roof plan worked perfectly. The flat roof will be no problem at all, and that solves a lot of other production issues.
